Start of own production
in Toledo (Spain) with a
SMD production line.

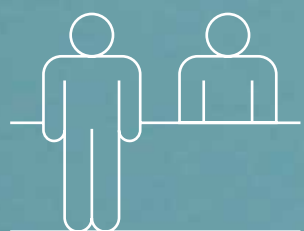

2017
New production line
for technical
technical product

Growth

Corporate culture

Customer and results oriented

Customers are our raison d'être, and results are essential for our continuity and growth

Teamwork

The best way to achieve our goals is through collaboration, support and knowledge sharing

Trust

We strive for reliability in our work and the quality of our relationships with customers, suppliers and colleagues, thus fostering a more productive and dynamic collaboration

Commitment and responsibility

We work with tenacity, certainty and fighting spirit. We are defined by a job well done to achieve and meet our clients' objectives in a timely manner.

Transparency and closeness

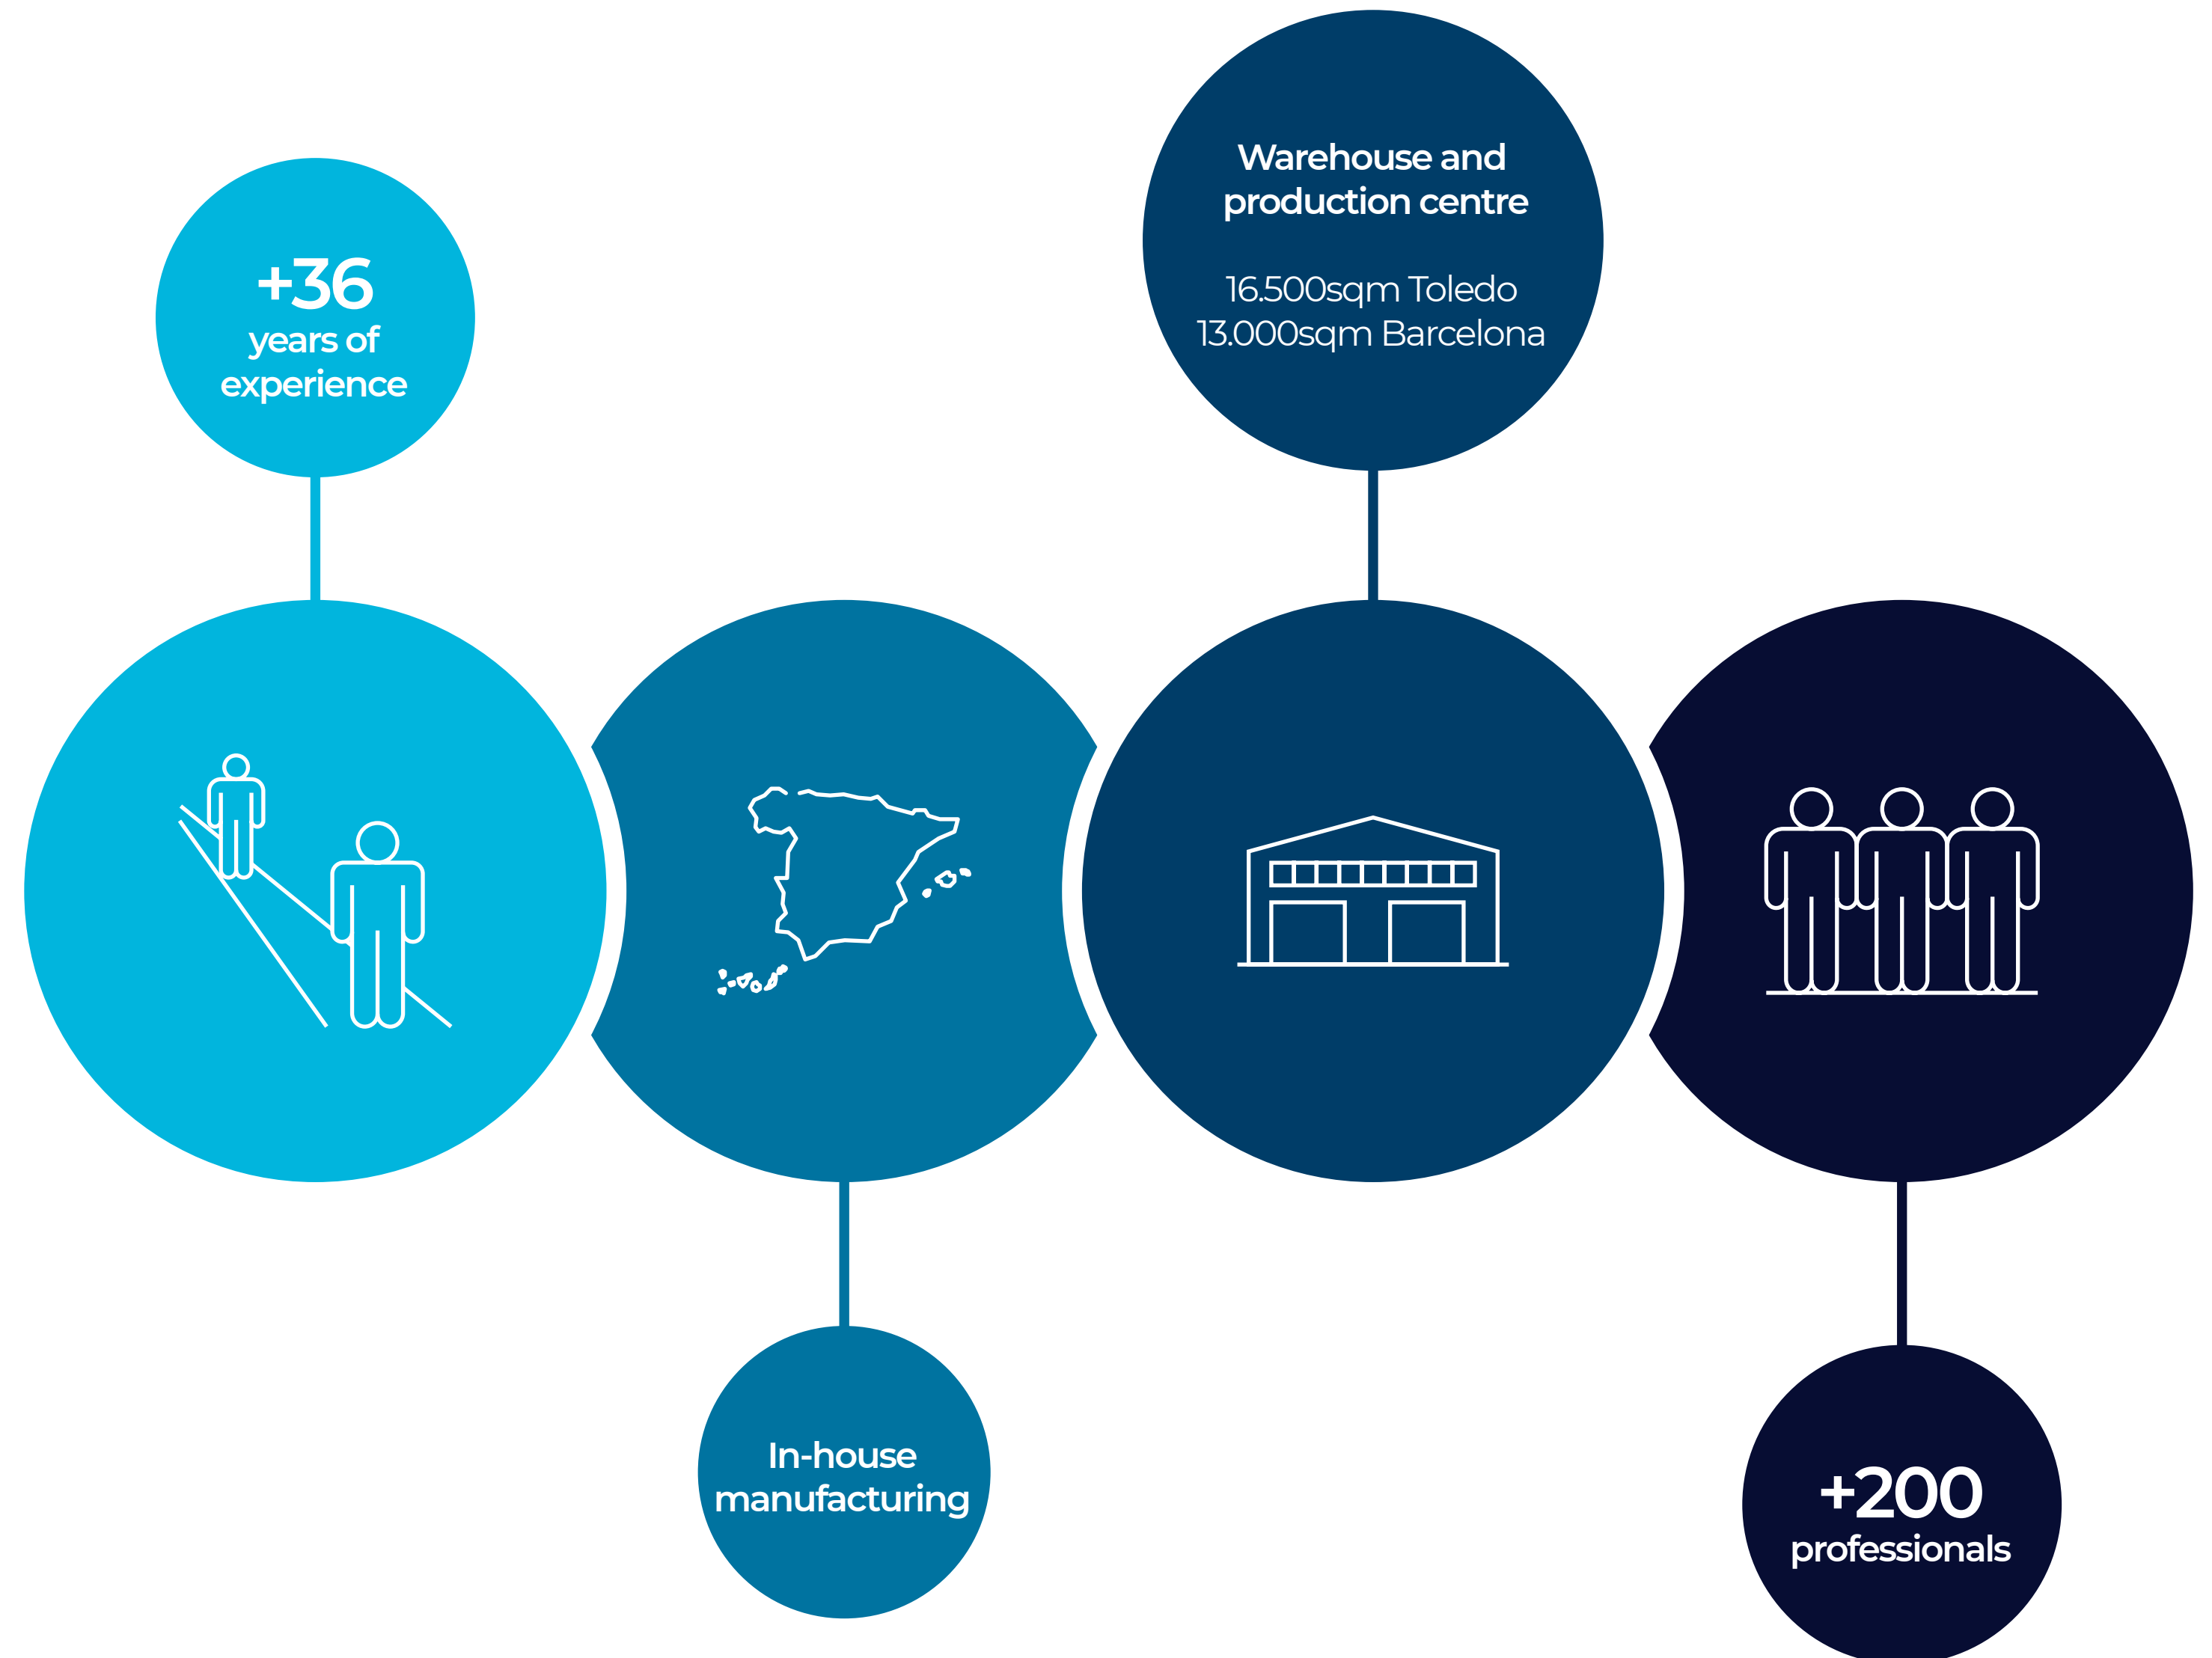

Our company is distinguished by its ability to understand, respond, resolve and accompany our clients in different situations

Prilux, more than just a manufacturer

We are a **proactive** and **multidisciplinary** team that enjoys working to offer **unique experiences** through light

Our production system based on lean manufacturing allows us to offer the market **economically competitive solutions** within the **required deadlines** to adapt to customer needs

Customisation, flexibility, efficiency and **sustainability** are the pillars that drive us to design and manufacture luminaires and control solutions **“Made in Spain”**

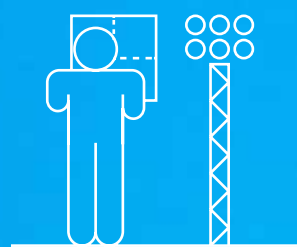

Together we go further

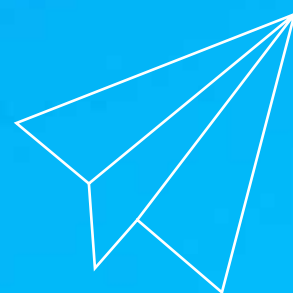

Working locally and in a personalized way with our clients allows us to carry out an **international expansion strategy** with a presence in Central Europe, Eastern Europe, North Africa, the Middle East and Latin America

Why trust Prilux?

Service

Our teams focus on high quality service by accompanying the customer throughout the different phases of the process (advice, commissioning, technical assistance and after-sales service).

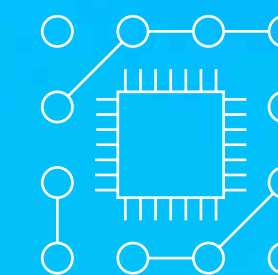

Flexibility

We adapt to the client's needs by offering solutions economically competitive and within the required deadlines

Quality

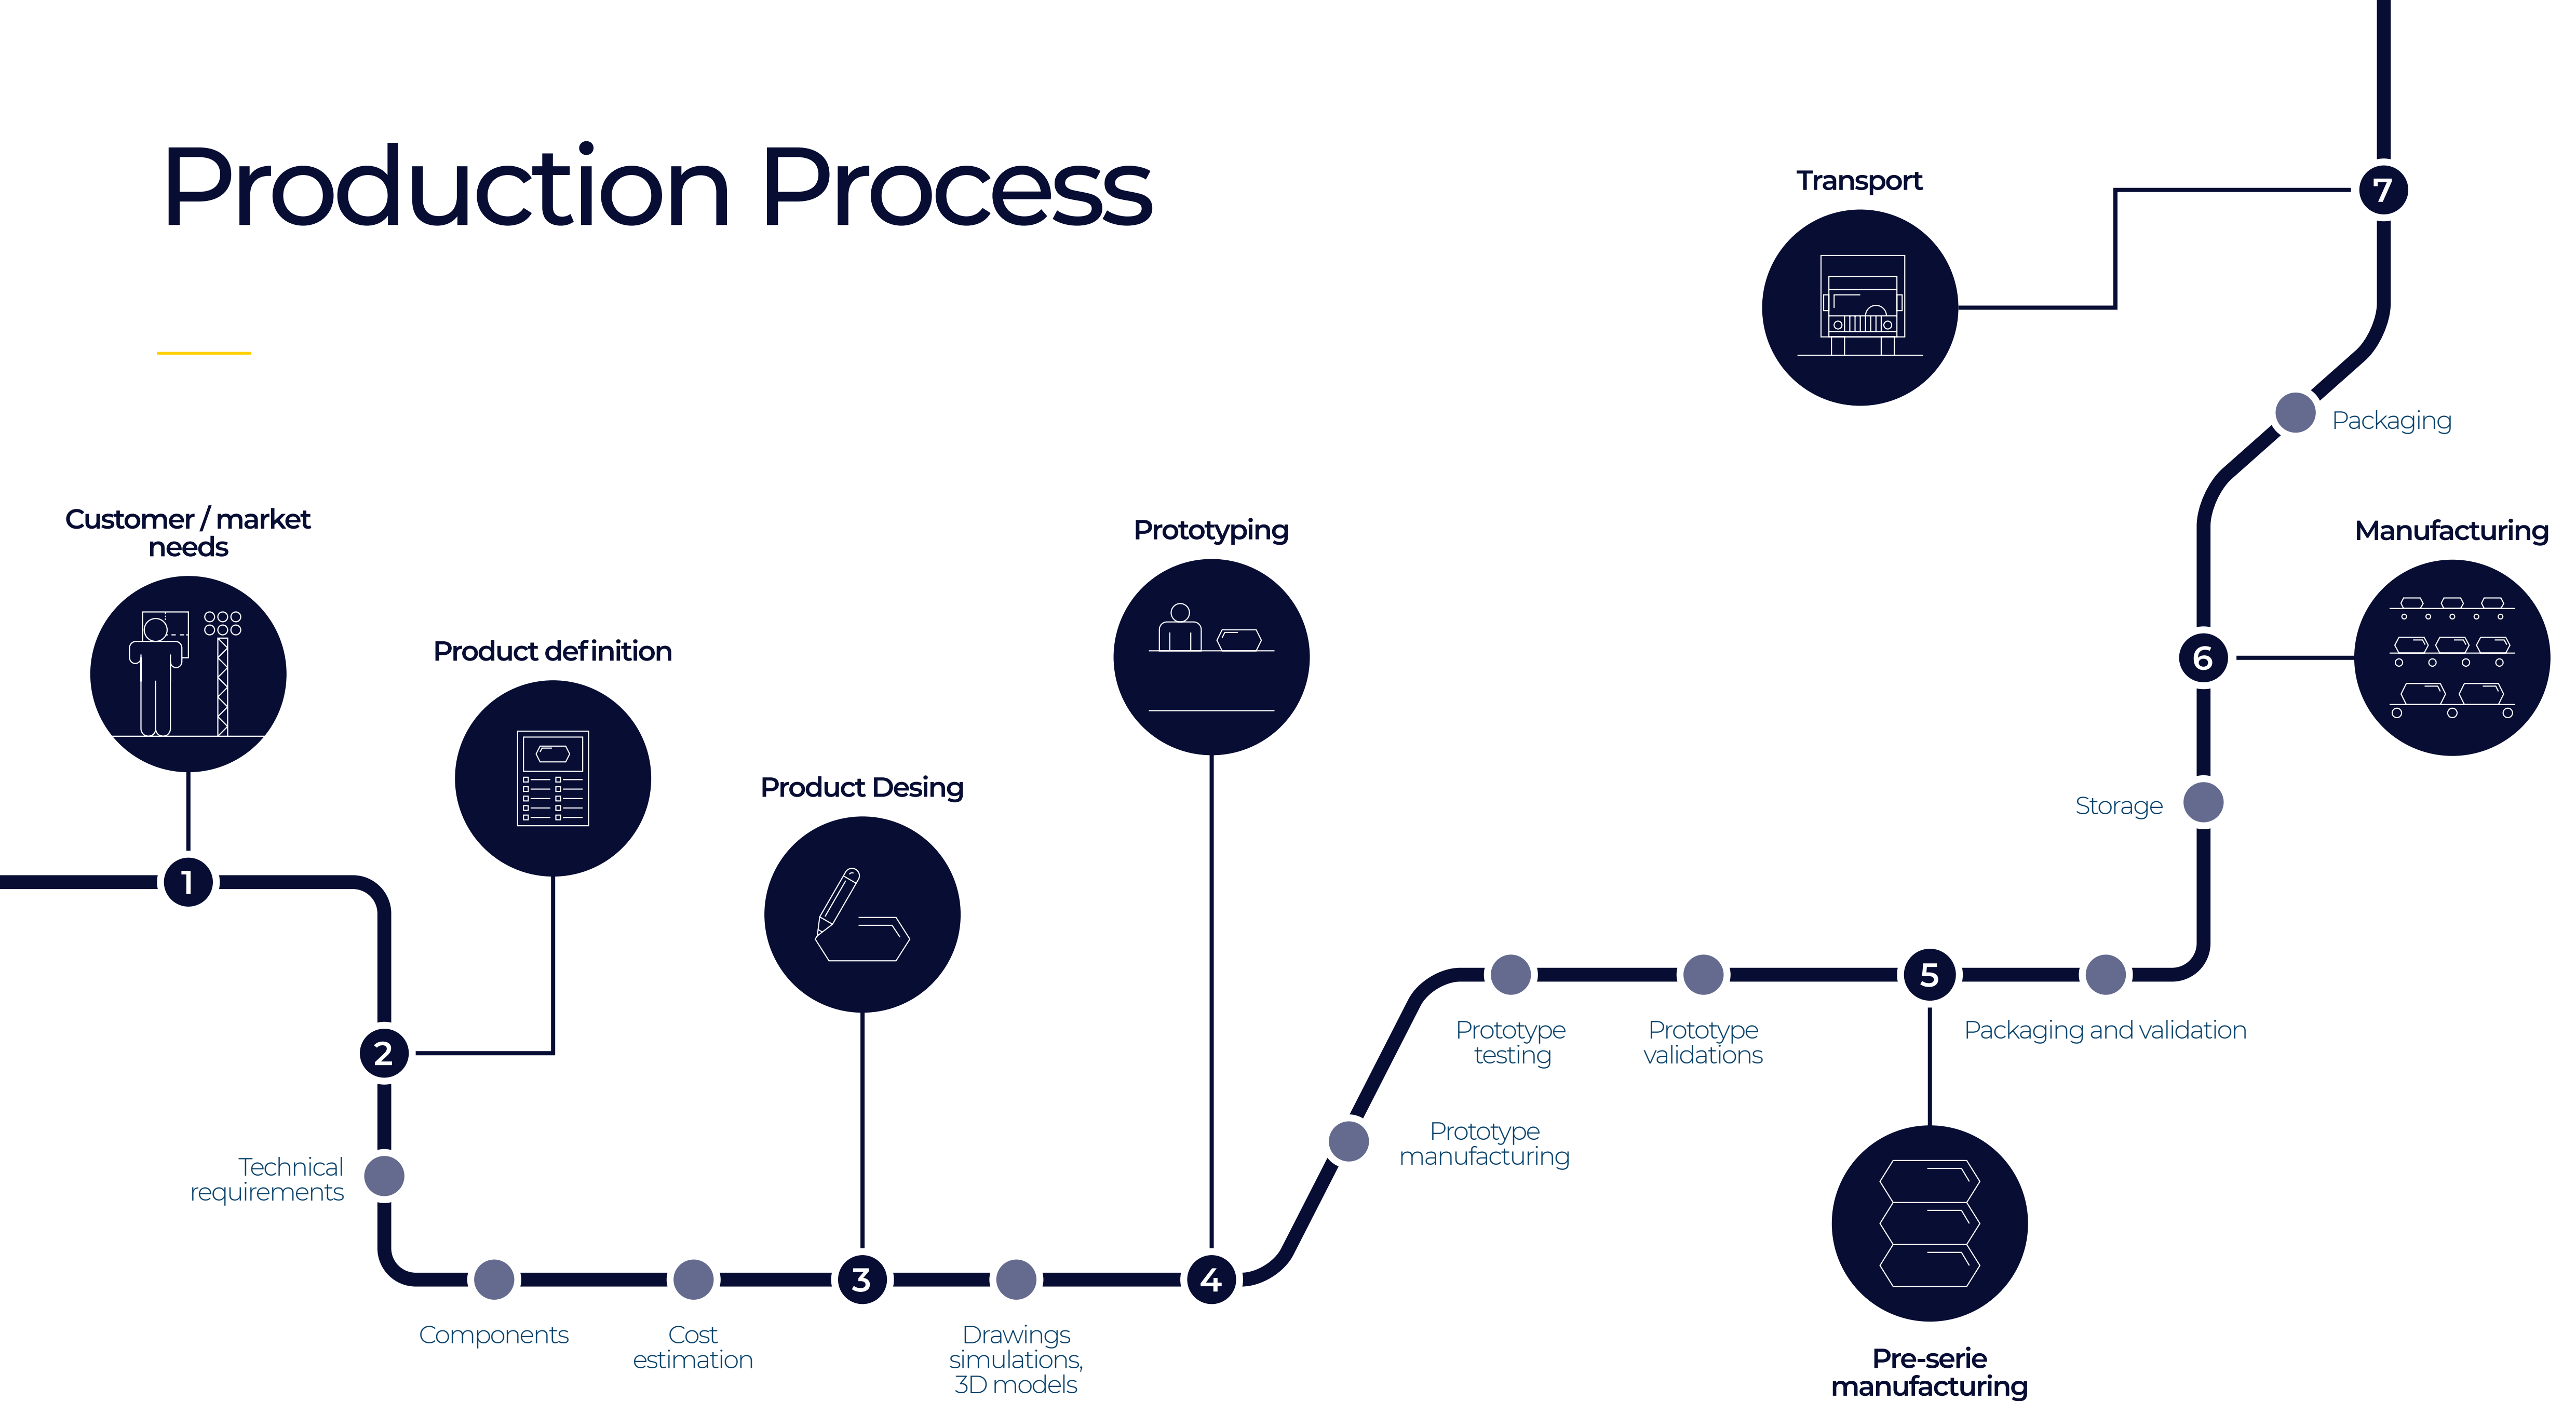

Committed to Total Quality, as strategic management model, on the path to business excellence

Innovation

We work to keep up with the latest technological innovations, to develop smart solutions that adapt to the changing pace of the market

Production Process

Sectors

Strategic partner

We **accompany** and **advise** our clients throughout **their projects**, forging a **solid relationship**, achieving their **objectives** and facing **new challenges**.

Connecting the future with the present through innovation

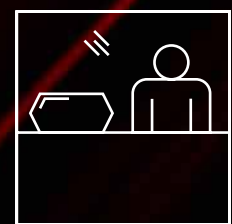

Smart
Solutions
"Made in Spain"

We are a **company in constant movement, innovative and at the forefront of the latest technology** with a strategic vision of the future that makes us a benchmark in the sector. We develop scalable **own technology** that allows optimal management of consumption, improves user comfort and generates significant **energy savings** to achieve more **sustainable environments**.

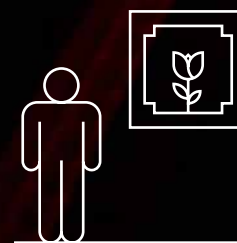

We offer the market **smart solutions "Made in Spain"** for the **cities of the future**, that go beyond lighting, responding to the needs and expectations of society

Total Quality

We work towards **total quality** as a model of strategic management, with the aim of seeking the **awareness of excellence** in all of our processes. This model of action increases the **organisation's efficiency** and **flexibility**

In Prilux, we have the following certifications issued by SGS (Société Générale de Surveillance):

ISO 9001.
International standard for a Quality Management System (QMS)

ISO 14001.
International standard for an Environmental Management System (EMS)

ISO 45001.
International standard for Health and Safety at Work.

ISO 50001.
International standard for an Energy Management System.

The key
to business
excellence

Committed to sustainability

Environmental responsibility

We are aware of the relevance of society as a whole in the preservation and care of the environment.

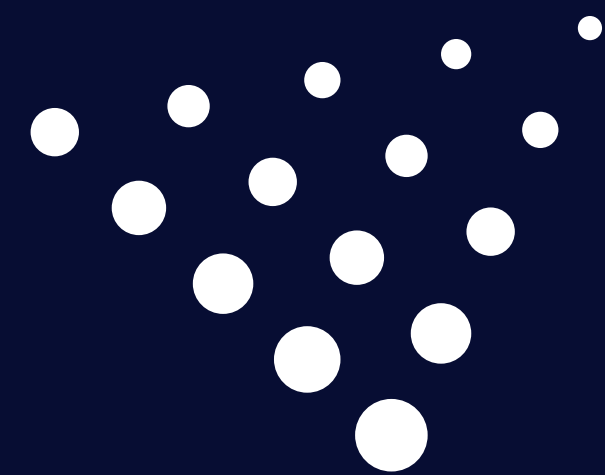

At Prilux we have developed our own environmental policy, as part of a business strategy, based on the compliance with regulations and the continuous improvement of our processes

Energy policy

At Prilux, we have established systems and processes to constantly improve energy efficiency and the use and consumption of energy within our facilities. Due to the implementation of an energy management system, in accordance with the UNE-ISO 50001 standard, we have optimized economic costs and greenhouse gas emissions.
